Black survival chiara build

Chiara's Stigma weakens the enemy's armor. Fighting an enemy for an extended period of time gives you the advantage. Judgment is more effective with each Stigma stack on an enemy. Chiara has great early game with her stigma stacks. She can easily matches if the opponent does not have strong active skills. She is a little hard to use because her active skill is not that great. But with food, decent armor, and arm you treat all the damage. You have to keep fighting to make use of its stigma stacks, hence you to hoard more food with the expectation of having extensive fights to use the full potential of Stigma. The more you hit your enemy, the more damage stigma stacks do. Chiara also has D+ Mastery on Blade which gives her an extra edge at the start. This gives her more potential for early game dominance. Despite being 12/12, Chiara is a capable early game contender due to Stigma, which gives her the slight damage she needs to fight against most other average early game characters. However, because Judgment knew those stacks, it basically counteracts its equity. Since Judgment is not so good to begin with, it is difficult to find a right time to use it. In other words, Chiara's basically play with an average ability compared to the usual two skills of other characters. Abilities[edit | edit source] Stigma is a passive skill that handles +1 damage with each stack on the enemy, up to 11 stacks. With max stacks, she has +11 additional damage to the enemy. That's a large number and gives Chiara a solid constant DPS. She excels in protracted battles because of this skill. The longer the fighting, the more additional damage they can inflict. The other good thing about Stigma, which is often overlooked, is that it applies a debuff to the enemy and applies to all the attack damage they receive. If an enemy has 11 stigma stacks on them, not only will Chiara do an additional 11 damage to them, but any other character that attacks them will also do an additional +11 damage to them. Meanwhile, Judgment is an active skill that converts all stigma stacks into Judgment debuff. Judgment will admit skill damage to the enemy, depending on how much stigma stacks are inflicted on them (number of Judgment stacks *3). The Judgment debuff will activate and disappear after the enemy attacks everyone for more than 9 damages. If you use Judgment at max stacks, then when the enemy attacks they will receive a 33 skill damage nuke. Judgment is lackluster. A passive +11 damage on each hit is better than a one-time 33 skill damage nuke that will reset the stacks. Without the stacks, Chiara loses its +11 damage output. It would be as if they did not had until she builds the stigma stacks up again. Someone can explain what is the best route for chiara? Page 2 10 comments Welcome to our Eternal Return: Black Survival layer list based primarily on win percentages. This tier list may be a bit rough because the North American playerbase is still small alongside Korean Korean This leads to less data to work with, but I wanted to give people something while I continue to learn Eternal Return myself. If you're a beginner looking for tips, we have a lot here as well. Eternal Return: Black Survival Tier List (Solo Win Rate) Characters are positioned based on their solo winrate with their best weapon. Look below the image to see what each character's current best weapon is in relation to wins. Also, this list is based on data from all players in November 2020, not just higher level play. Percentages next to each weapon are their winning percentage. Eternal Return: Black Survival Unable to Open Boxes and Level Up Skills. It doesn't happen often, but enough times where it is very annoying. I lost so much lp because of this bug. I usually only play Chiara when it matters and I can walk around, but I can't open anything, pick up something on the ground, can't harvest anything, can't level my own abilities. This happens as soon as the game starts, so I have to throw up immediately, even before being able to do something that is very frustrating.... 15 hours ago Bug Reports 10 people found this review useful1 person found this review funny December 16Th Early Access Review It's a nice idea to mix so many elements from different games into one, but between huge balance problems and a terrible control schedule it's probably the most stressful battle royale game I've tried. 1,404 products in account Guide [Eternal Return Gameplay] - The New Player's Guide to Eternal Return: Black Survival - Community Guide by Jynx There are many new players coming to Black Survival: Eternal Return - either completely fresh, or from other MOBAs - and something I hear is often things along the lines of: I can't do any damage, Defense is too strong, Everyone does ... 4 people found this review useful2 people found this review funny 0 Posted: December 14Th Early Access Review Perfectly fair, this game is not very nice. It leans into the slow tedious gameplay loop that battle royals are criticized for. Run around and walk for 10 to 20 minutes, hoping you get the items you need, and Fight another player. The only difference is that this game includes classic League of Legends styled styled So all the boring repetitive parts of BR games are now dressed in outdated MOBA mechanics.3 hours into the game and I felt like every game I played was determined by the most crap factors. Why would I want to farm for 20 minutes in a 15-person battle royal if I can just play League of Legends. The characters are interesting, but I can't get past the feeling of being held back by the Loot/Crafting system. It's really frustrating so feel like you don't have a hold of Fire character going brr just because every interaction with another player ends up with them running from you or behind you for 3 minutes straight. Tl;dr. This game feels like the phrase A wild goose chase became a playable experience. 549 products in account Guide Best Restorative Consumables for Ease and Effectiveness This guide is especially intended for those who want to know what to make with their bread and water, as well as what top consumables they can make for the endgame.
